Department of Computer Science

## INDEX

S No.	Objective	Date	Sign
1	Create "Hello World" application that will display "Hello World" in the middle of the screen in the emulator. Also display "Hello World" in the middle of the screen in the android phone.	--/01/2021	
2	Create an application to display various android activity lifecycle phases.	--/01/2021	
3	Create an application with first activity with an editText and send button. On click of send button, make use of explicit intent to send text to second activity and display there in text view.	--/02/2021	
4	Create an application with first activity with an editText and send button. On click of send button, make use of implicit intent that uses a SEND ACTION and let user select app from app chooser and navigate to that application.	--/02/2021	
5	Create spinner with strings taken from resource folder (res >> value folder) and on changing the spinner value, Image will change.	--/03/2021	
6	Create a menu with 5 options and selected option should appear in text box in upper case.	--/03/2021	
7	Create a radio button group with radio button of all courses in your college and on selecting a particular course, teacher-in-charge of that course should appear at the bottom of the screen.	--/04/2021	
8	Create a list of all courses in your college and on selecting a particular course parent department and the teacher-in-charge of that department should appear at the bottom of the screen.	--/04/2021	

9	(a) Create an application with three buttons (with different colour names) vertically aligned, on selecting a button colour of the screen will change. (b) Create an application with three buttons horizontally aligned, on selecting a button colour of the screen will change.	--/04/2021
10	Create a Login application (check username and password). On successful login, pop up the message. ("Welcome username")	--/04/2021
11	Create a login application as above, on successful login redirect to another activity with logout button. On click of logout button a dialog appears with OK and CANCEL button. On OK button click go to login activity and on CANCEL stay at same activity.	--/04/2021
12	Create an application to Create, Insert, update and Delete operation on the database.	--/04/2021

## PRACTICAL 1

### Objective

Create “Hello World” application that will display “Hello World” in the middle of the screen in the emulator. Also display “Hello World” in the middle of the screen in the android phone.

### Code

app/src/main/res/layout/activity\_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:padding="75dp"
    tools:context=".MainActivity">

    <TextView
        android:id="@+id/tvHelloWorld"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_centerInParent="true"
        android:text="Hello World!"
        android:textColor="#FF0000"
        android:textSize="36sp"
        android:textStyle="bold" />

</RelativeLayout>
```

app/src/main/java/pro/ghosh/helloworld/MainActivity.java

```
package pro.ghosh.helloworld;

import android.os.Bundle;
import androidx.appcompat.app.AppCompatActivity;

public class MainActivity extends AppCompatActivity {
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
    }
}
```

## Output

**Hello World!**

## PRACTICAL 2

### Objective

Create an application to display various android activity lifecycle phases.

### Code

app/src/main/AndroidManifest.xml

```
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"
    package="pro.ghosh.activitylifecyclephases">

    <application
        android:allowBackup="true"
        android:icon="@mipmap/ic_launcher"
        android:label="@string/app_name"
        android:roundIcon="@mipmap/ic_launcher_round"
        android:supportRtl="true"
        android:theme="@style/Theme.ActivityLifeCyclePhases">
        <activity android:name=".AnotherActivity"></activity>
        <activity android:name=".MainActivity">
            <intent-filter>
                <action android:name="android.intent.action.MAIN" />
                <category android:name="android.intent.category.LAUNCHER" />
            </intent-filter>
        </activity>
    </application>

</manifest>
```

app/src/main/res/layout/activity\_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <Button
        android:id="@+id/btnGoToAnother"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_centerInParent="true"
        android:text="Go to Another Activity" />

</RelativeLayout>
```

```

app/src/main/java/pro/ghosh/activitylifecylephases/MainActivity.java
package pro.ghosh.activitylifecylephases;

import android.content.Intent;
import android.os.Bundle;
import android.view.View;
import android.widget.Button;

import androidx.appcompat.app.AppCompatActivity;

public class MainActivity extends AppCompatActivity {
    private Button btnGoToAnother;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        btnGoToAnother = (Button) findViewById(R.id.btnGoToAnother);
        btnGoToAnother.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View v) {
                Intent intent = new Intent(MainActivity.this, AnotherActivity.
class);
                startActivity(intent);
            }
        });
    }
}

```

```

app/src/main/res/layout/activity_another.xml
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".AnotherActivity">

    <Button
        android:id="@+id/btnGoToMain"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_centerInParent="true"
        android:backgroundTint="@color/teal_200"
        android:text="Go Back to Main Activity"
        android:textColor="@color/black" />

</RelativeLayout>

```

```

app/src/main/java/pro/ghosh/activitylifecylephases/AnotherActivity.java
package pro.ghosh.activitylifecylephases;

import android.content.Intent;
import android.os.Bundle;
import android.util.Log;
import android.view.View;
import android.widget.Button;

import androidx.appcompat.app.AppCompatActivity;

public class AnotherActivity extends AppCompatActivity {
    private final String LOG_TAG = "AnotherActivity";
    private Button btnGoToMain;
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_another);
        Log.d(LOG_TAG, "Activity Created");
        btnGoToMain = (Button) findViewById(R.id.btnGoToMain);
        btnGoToMain.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View v) {
                Intent intent = new Intent(AnotherActivity.this, MainActivity.
class);
                startActivity(intent);
            }
        });
    }
    @Override
    protected void onStart() {
        super.onStart();
        Log.d(LOG_TAG, "Activity Started");
    }
    @Override
    protected void onResume() {
        super.onResume();
        Log.d(LOG_TAG, "Activity Resumed");
    }
    @Override
    protected void onPause() {
        super.onPause();
        Log.d(LOG_TAG, "Activity Paused");
    }
    @Override
    protected void onStop() {
        super.onStop();
    }
}

```

```

        Log.d(LOG_TAG, "Activity Stopped");
    }
    @Override
    protected void onDestroy() {
        super.onDestroy();
        Log.d(LOG_TAG, "Activity Destroyed");
    }
    @Override
    protected void onRestart() {
        super.onRestart();
        Log.d(LOG_TAG, "Activity Restarted");
    }
}

```

## Output

GO TO ANOTHER ACTIVITY

GO BACK TO MAIN ACTIVITY

```

2021-03-07 17:15:09.397 17011-17011/pro.ghosh.activitylifecyclephases D/AnotherActivity: Activity Created

}
```

## Output

The image displays two side-by-side screenshots of an Android application's LoginValidation screen. Both screenshots show a dark blue header with the title 'LoginValidation'. The status bar at the top indicates the time as 5:32 on the left and 5:33 on the right, along with signal and battery icons.

The left screenshot shows the initial state of the login form:

- E-mail ID**: An input field with a light blue underline.
- Password**: An input field with a light blue underline.
- LOGIN**: A blue button with white text.
- REGISTER**: A blue button with white text.

The right screenshot shows the form after input:

- E-mail ID**: The input field contains the text 'sudipto@arsd.du.ac.in'.
- Password**: The input field contains a masked password represented by eight dots.
- LOGIN**: A blue button with white text.
- REGISTER**: A blue button with white text.
- Registered**: A new light gray button with rounded corners and black text, positioned below the REGISTER button.

At the bottom of both screenshots is a black Android navigation bar with three icons: a back arrow, a home circle, and a recent apps square.

## Output

## PRACTICAL 12

### Objective

Create an application to Create, Insert, update and Delete operation on the database.

### Code

app/src/main/res/layout/activity\_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
